

Digital therapeutic solutions for people living with diabetes

Helping you live a healthier life

 **RPYXSI**[®]
SENSORY INSOLES

Diabetes is a complex disease that can affect anyone, everywhere.

70%

of people with diabetes develop peripheral neuropathy¹

Living with diabetes and peripheral neuropathy can be debilitating. The loss of sensation and chronic pain in your hands and feet can make daily life a challenge.

Even small issues like a rock in the shoe or a small cut on the foot can quickly become major problems.

Health monitoring technology that goes with you

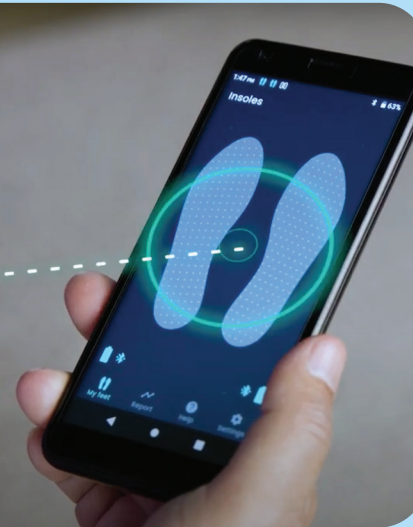

Wear the sensory insoles to monitor your foot health and receive alerts for sustained high pressure levels

Your foot health information is continuously collected as you go about your daily activities

Our remote nurses monitor your foot health trends and will contact you about making adjustments before complications escalate

Reconnect with your feet

Your first step towards healthier living starts here

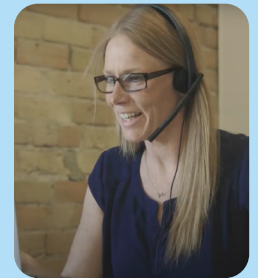

It all starts with prevention

- The Orpyx SI[®] Sensory Insole system is an easy-to-use solution, engineered to seamlessly fit into your shoes
- You receive simple to follow notifications that inspire immediate behavior change
- We partner with your healthcare provider by collecting real-world data that leads to meaningful insights

Customer care center

- Our nurses are here to support you and your doctor so that you're able to take steps towards a healthier life
- Our team is eager to help you get your device setup and answer any questions about our sensory insole system

ORPYX SI
SENSORY INSOLES

Hear what our customers have to say

“ [Orpyx SI] is very simple... it's comfortable to wear, and you forget that they're there. They are part of your shoes and your everyday life, and it's just great to be able to have the feedback on the phone and see how it impacts my foot health. ”

- Patient Pat, Orpyx SI Customer

Talk to your doctor about Orpyx

Talk to your health care provider about managing peripheral neuropathy and how the Orpyx SI Sensory Insole system can help you protect your feet.
